

GQ22

The ticket dispensers are the first physical engagement your customer has with your environment. These attractive and intuitive components act as an on-premise gateway for customers, citizens and patients, giving them a way to select services.

Therefore take care of your first physical engagement and choose a modern and stylish design to utilise the power of the first impression.

Features and benefits

Modern and stylish design:

Our free-standing ticket dispenser has a unique eye-catching glass front, which provides to the totem a modern and stylish design. A well-placed quality ticket dispenser can make the difference, offering your audience an easy customer journey

Durable glass portrait display

The housing of the totem is made from metal and glass in the front, the portrait display size is 22". The durable glass portrait display is designed for areas with heavy footfall providing access to information, services commerce applications. The screen is manufactured with a toughened glass fascia, making it suitable for users, customers and audiences an opportunity to view and engage with chosen service, information or content.

Quality solution offers your audience an effective journey

Freestanding ticket dispenser with portrait touch display is designed for 24/7 applications. Ideal for selecting information, communicating information complete with custom branding, this solution offers a perfect solution for a wide range of standard and specialist display applications. Utilise your engagements with increasing sales and improving the overall sales experience.
