

PRO counter calling terminal

CCTP-B

The hardware counter calling terminal, as an alternative for the software terminal, is a crucial component of the customer management, from the staff perspective. The device makes possible to follow up on the waiting customers, to call a new customer, to start and close the service. The counter terminal's activity will be recorded in the central statistics.

The PRO model, besides basic functions, performs various extra tasks, such as customer transfer or closing code attachment to the service.

➔ TECHNICAL PARAMETERS

- ➔ 128x64 pixel OLED display
- ➔ Power supply: 12V
- ➔ Communication connector: RJ11
- ➔ 17 buttons
- ➔ Easy to handle, ergonomic design

SIZES	Width	Depth	Height
	106 mm	54 mm	176 mm

➔ FUNCTIONS

- ➔ Graphical display of data and functions
- ➔ Log-in and out
